

Welcome to the 2nd (Last) Workshop on Low Emittance Ring Lattice Design

Thursday 01.12.16 - Friday 02.12.16

Elite Hotel Ideon Lund

EuCARD-2 supported Workshop - WP6 - Task LERD

Topics of the Workshop

- Upgrade Projects : 7 projects at various stages of design or realization
- New Projects/Concepts: HEPS, CLIC DR, VLCSR
- Optimization Techniques/Tools/Codes and their Application: Various (Low Emittance Tuning, Envelope Tracking, MOGA, AD Tune Shift Compensation, ...)
- Specific Topics: Injection at HEPS, Bunch Separation Schemes

A lot of interesting topics for a one and half day workshop.

We have to stick to the schedule relatively closely ...

Please upload your Presentations to Indico if possible ...

!!! Big Thanks to Staff from MAX-IV involved in the Organization of the WS !!!
