

Infrared Chemical imaging for the future. March 8-9, 2017, Uppsala

Wednesday 08 March 2017 - Thursday 09 March 2017

Ångströmlaboratoriet, Uppsala

Book of Abstracts

Contents

Registration and Lunch	1
Why do you want to use infrared light from synchrotron radiation storage rings?	1
Questions discussions	1
Synchrotron Infrared spectroscopy as a diagnostic tool for clinical application.	1
New light on Alzheimer's disease	1
Scanning-probe chemical imaging down to 30 nm spatial resolution	1
Questions discussions	1
Biological imaging in the infrared; from bones to brains	1
Bone and healing of bone	2
Materials at Extreme Conditions; High Pressure, Low Temperatures and Everything Else	2
All Your Scientific Cases; Meet With the Speakers for Questions, Discussions	2
Predinner talks together with the iBiomat workshop	2
Good morning!	2
Cells and Tissues; Infrared and X-rays	2
Three-Dimensional Infrared Chemical Imaging; Spectro-Microtomography	2
All Your Scientific Cases; Questions, Discussions and Wrap Up	3
END	3
Presentation of a workshop	3

Registration and Lunch

1

Why do you want to use infrared light from synchrotron radiation storage rings?

2

Questions discussions

3

Synchrotron Infrared spectroscopy as a diagnostic tool for clinical application.

4

New light on Alzheimer's disease

5

Scanning-probe chemical imaging down to 30 nm spatial resolution

6

Questions discussions

7

Biological imaging in the infrared; from bones to brains

8

Bone and healing of bone

9

Materials at Extreme Conditions; High Pressure, Low Temperatures and Everything Else

10

All Your Scientific Cases; Meet With the Speakers for Questions, Discussions

11

Predinner talks together with the iBiomat workshop

12

Good morning!

13

Cells and Tissues; Infrared and X-rays

14

Three-Dimensional Infrared Chemical Imaging; Spectro-Microtomography

15

All Your Scientific Cases; Questions, Discussions and Wrap Up

16

END

17

Presentation of a workshop
