Hands-on: Kubernetes@SKA

Thursday, 14 October 2021 14:35 (15 minutes)

For the development of SKA devices the TANGO-framework has been packaged into a set of container used in order to deploy it with kubernetes as container orchestration.
In the present talk, the devopment workflow for a generic device will be demonstrated in the context of kubernetes.

To follow the talk and make the examples work, it is recommended to follow those steps before the presentation: https://gitlab.com/ska-telescope/ska-tango-examples#installation

Presenter: DI CARLO, Matteo (INAF)

Session Classification: Session 1
