

## Preparation

*Thursday, 14 October 2021 16:25 (5 minutes)*

The Open Space session will follow this plan:

1. A brief introduction to open space will be given.
2. Participants will spend 2 minutes thinking through if they have any burning issues they'd like to raise.
3. A schedule will be presented with different breakout rooms for each subjects.
4. The question are presented by their respective authors for 15 min.
5. At the end a collective summary will be given to the main virtual room.

The open session will finish with a second slot of 15 min if the time allows.

Few rules define an open space discussions, here the most important:

- \* The subjects are discussed in a constructive manner to keep a trusted environment.
- \* The question are presented by their respective authors for 15 mn. They cannot switch room.
- \* As participant you are welcome to switch room whenever you want. If at any time during your time here you find yourself in any situation where you are neither learning nor contributing, use your two hand, and go somewhere else.

Open Space Technology (OST) is a method for organizing and running a meeting where participants are invited to focus on a specific, important task or purpose. The actual agenda-schedule of topics discussion is partly or mostly unknown until people begin arriving.

**Presenter:** HARDION, Vincent (MAXIV Laboratory)

**Session Classification:** Open Space Session
