Recent results and update of instrumentation for soft x ray resonant scattering and coherent imaging at ALBA synchrotron light source

Wednesday 15 April 2026 11:30 (30 minutes)

The facilities for soft x-ray resonant scattering and coherent imaging at ALBA synchrotron (presently BOREAS beamline) will be overview, including details on recent and on-going upgrades. The capabilities will be illustrated through a wrap up of recent results by various user teams and the beamline team.

Presenter: VALVIDARES, Manuel (ALBA Synchrotron Light Source)

Session Classification: Beamlines, overview
